MEMORANDUM

Mr. Proctor chaired and [] substituted.

1. Mr. Colby attended and opened the meeting by discussing the Key Intelligence Questions. He looks upon the KIQ's primarily as a vehicle for communication between himself and the heads of the other Agencies in the Community. In practical terms, the DCI sees the KIQ's as "a means of hooking the substance of intelligence to the money."

2. Mr. Colby also discussed in some detail how he sees the NIO machinery developing. He stressed that formal actions for production are to pass through the regular command lines and asked for feedback on whether this is the way it is working out. He received firm assurance that this procedure was being followed to the letter.

3. Mr. Eisenbeiss asked if follow-up action may be required to make certain that Management Committee decisions are carried out. Mr. Colby agreed and said that Mr. Duckett as the Management Committee Secretary should have this authority but delegated to the Comptroller.

4. Mr. Proctor pointed out to Mr. Colby the slowness of getting slots and money necessary for OPR and OSR's new SEC.
